

## 2022 Goals

### Environment –

- In partnership with the County, establish a strategy for our landfill
  - Increased recycling options
  - GARNA study (underway)
  - State mandate regarding single use plastic (2023)

### Water –

- Implement priorities from the water master plan that will address water conservation planning
  - Citizen education
  - Infrastructure improvements
  - Understanding water usage and loss
  - Development regs

### Economic Vitality

- Utilize, in part, the County recovery conversation, to understand longer-term effects of COVID on community.
  - Partnership with EDC/Chamber to survey existing businesses
  - Review of UDC to understand existing dev regs (what do we allow and does this meet our vision?)
  - Planning for town owned properties
  - *Balance needs of existing businesses and residents while bringing in new development opportunities.*

## Infrastructure

- Continue making connections in the community (pre-development for continuity?)
  - Sidewalk replacements (cost sharing program, street fund)
  - Development standards (alleys, trails, sidewalks)

## Community

- Identify strategies for public outreach/public relations process
  - If there is a tax initiative
  - Use of town owned properties
